

MANAGEMENT OF RISK STATEMENT

In accordance with Risk Management, all service users will have an individual risk assessment carried out prior to commencement of service, and which will be reviewed regularly. This will take into account service users' rights to take risks whilst not being over-protective.

All staff will be trained in the management of risk in relation to policy.

There is a clear written Accident/Incident and Violence and Aggression procedure to follow, along with a clear recording format. Copies of these forms will be submitted to the Care Commission in the event of a serious accident/incident or an episode of violence/aggression.
