

MEDICATION STATEMENT

- Home care staff will not fill Nomad[®] dispensers from bottles.
- Medication management assessment will be carried out by assessing worker and signed by service user.
- Where medical gases are used, such as oxygen, a clear risk assessment is to be attached to the care plan.
- Home care staff will prompt service users medication in line with company policy and procedure.
- Home care staff will receive training in relation to medication procedure during induction. This will include adverse reactions, recording, monitoring and disposal.
- The service user will have a detailed medication plan within hand-held records drawn up in conjunction with the GP instruction.
- Any changes in medication will be recorded and any changes in service user's ability to self-medicate will prompt a review.
- Outcome will be recorded and appropriate actions taken.
